Institute For Technology and Research Invites Research Proposals for Collaboration

The Institute of Technology and Research has played vital role in shaping the higher education in the country. It has been rendering a very useful service to the stake holders of higher education. With the mandate of providing an intellectual platform to the community of higher education for debating the issues and policy of emerging concern and providing research based recommendation to government of India, the outreach Division of Institute of Technology and Research was established in 2012. The Division since then has proved its credibility having conducted some of the important research studies which have provided vital inputs for decision making and devising the policy of higher education in the country, Impact of Higher Education on Women Empowerment .The modalities of the collaboration will be decided as per Institute of Technology and Research rules. A MoU will be signed between the collaborating institution and Institute of Technology and Research after finalization of the collaboration. The Research Proposals are invited from the member Universities/Institutions of Institute of Technology and Research for conducting Seminars, Conferences, and Workshops in collaboration with the Outreach Division of Institute of Technology and Research. Institute of Technology and Research will provide full support for conducting and publishing the research papers of any events related to research and innovation.

The interested universities/institutions are advised to send full proposal with details of budget, human resources and physical support base to Mr. B. Kumar Director & Head, Research Division, Institute of Technology and Research. For any further query please contact on: 9776047497, & E-mail: info@itresearch.org.in. The details can also be downloaded from ITRResearch Website: www.itresearch.org.in
